

Type 700 Precision Back Pressure Regulator

Reliable protection against over pressurization

Specifications

Flow Capacity	up to 50 SCFM (85 m ³ /hr) depending on set point pressure and port size.
Sensitivity	1/8" (3.2 mm) water
Maximum System Pressure	250 psig (1725 kPa)
Mounting	Pipe or panel
Ambient Temperature	0° F to 150° F
Weight	1.5 lb (.68 Kg)
Materials	Body: diecast aluminum alloy, baked enamel finish. Trim: acetal, brass, and plated steel. Knob: phenolic plastic.
